

It's Not About Collecting Data.

It's about what you do with it.

inCytes™ was built by clinicians for clinicians to capture and exploit clinical evidence. Users connect around the globe to communicate, collaborate and securely share insights that improve professional and patient experiences.

Here's How it Works

CIRCLES

Join, or create your own, inCytes™ Circle for team patient care, studies and trials, professional education or publication, registries and more. You are in control, but not alone.

LIBRARIES

Navigate easily through a large and evolving library of custom queries, surveys and assessments relevant to any particular pathology or treatment. Capture the "right" data.

INSIGHTS

Generate engaging reports to analyze outcomes, benchmark results, provide patient education and more. Put your data to work from day 1.

All this and more from your computer, tablet or phone for only 125€/month. Try it yourself for free or visit our [webpage](#) to learn more.
